- Exports recovered PST file in Office 365 format
- Supports MS Outlook 2016, 2013, 2010, 2007, 2003, 2002 & 2000
- Supports Windows 10 (32-bit & 64-bit)

Kernel for Outlook PST Repair deals with PST corruption issues that are happening because of Broken PST file, Disk Corruption, 2GB size limitation error, Virus Attacks, and unknown errors. All these errors adversely affect the accessibility of the Outlook items. It becomes necessary for the user to think of some solution to this problem. And Kernel for Outlook PST Repair is the best tool that can handle the situation.

While using the Kernel for Outlook PST Repair, it scans the damaged or corrupt PST with its advanced algorithm and restores the lost and deleted emails within a short duration of time. After the scan the recovered items are displayed in a tree structure. The user can select or search for the required items and can save them in MHTML, RTF, HTML, MBOX, MSG, DBX, EML, TXT and HTML format. Most importantly, the properties of the email items remain intact.

Kernel for Outlook PST Repair has many unique features. It retrieves password protected emails (supports high encryption as well as compressible encryption) and permanently deleted emails from the PST. Also it supports ANSI and UNICODE formats.

Our latest version of Kernel for Outlook PST Repair store the recovered data in the cloud-based Office 365 as well as save in various other formats. After the scans the damaged PST file, the tool gives you the option to select the desired file format. It also provides other options, you can directly export the data in the selected email servers (Microsoft Exchange Server, IBM Lotus Domino and Novell GroupWise) and web-based email clients (Google Apps, Gmail, Hotmail,Yahoo, AOL, Outlook.com and iCloud). if you pick Gmail as the web-based email format, you are prompted to enter your login details.

Kernel for Outlook PST Repair supports almost all versions of Outlook and Windows. Now, latest version supports the Windows 10 OS and MS Outlook 2016 edition.You can download the trial version of the Kernel from its website. The trial version of the software can be used to recover the lost emails items from the corrupt PST. But the trial version of the software does not have the facility to save the recovered files. If you want to save them, you need to purchase the software.
