

# Kernel SQL Backup Recovery

User Guide

Version 18.1

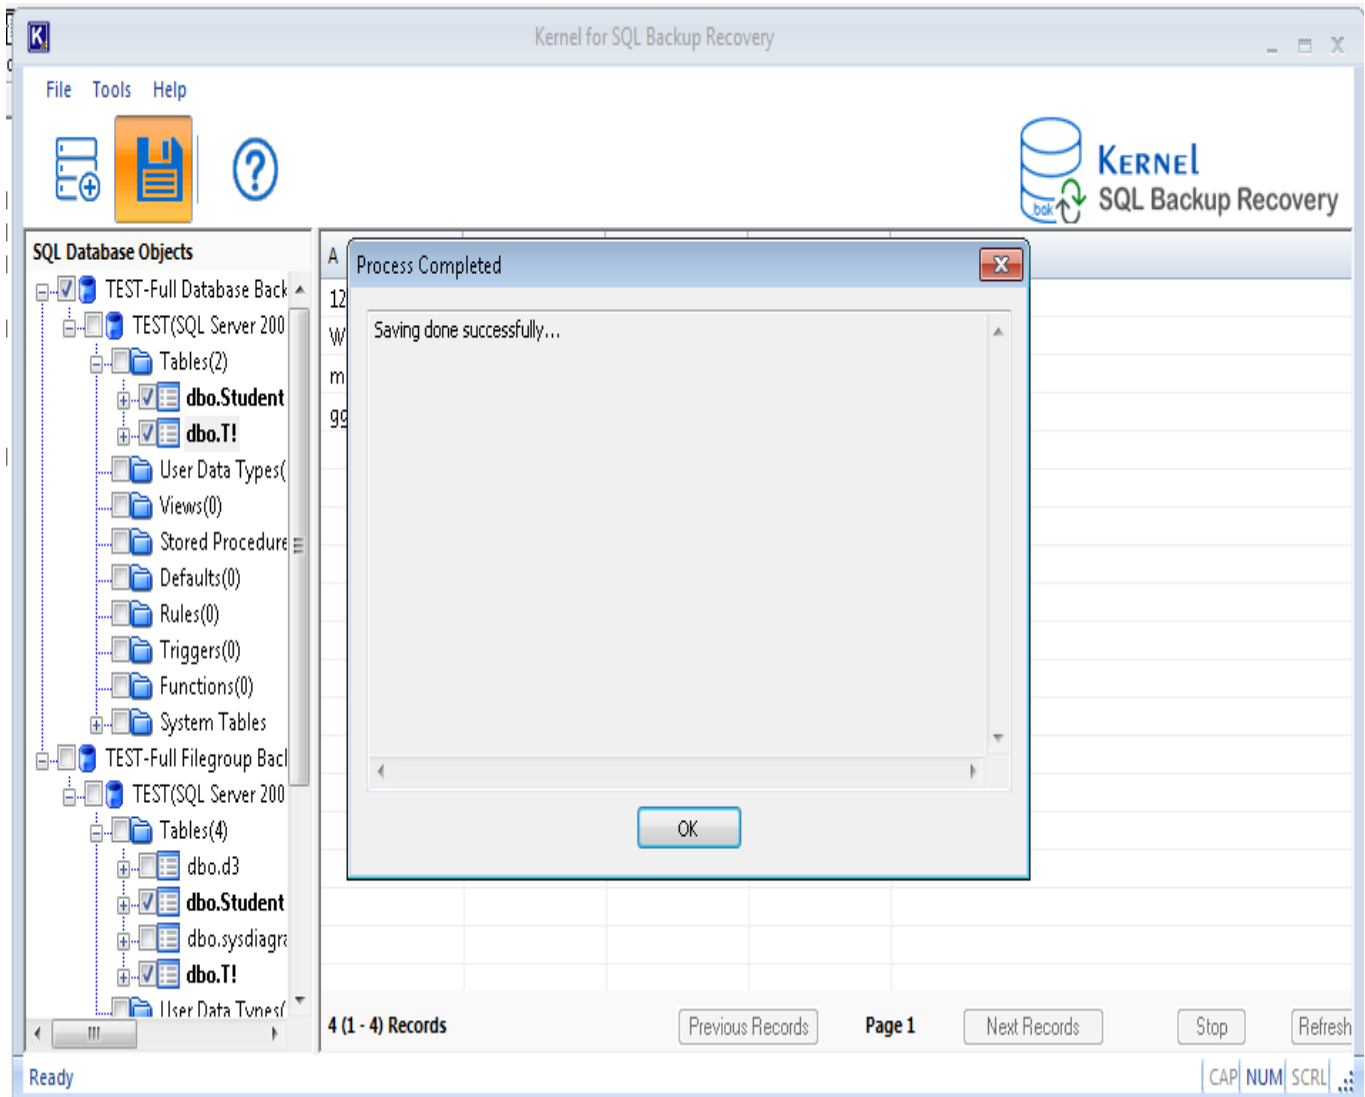

Figure 4.18 Saving Complete

10. Click the **OK** button to close the 'Process Completed' dialog box.

Using Batch File option, you can save the batch file of the rebuilt SQL backup file database on a desired location. The data so recovered is saved in separate script files at the desired location. Also, a script file (commit.bat) is also created that enables the user to easily copy the recovered objects to a new database created on SQL Server.

To copy recovered objects to new database on SQL server:

1. Go to SQL Server Management Studio
2. Create a New Database
3. Double click on commit.bat

OR

(Run->cmd ) Change the path to recovered folder ( cd PathName)

4. Use following syntax:

**>commit.bat servername newcreateddatabase sqlserverusername sqlserverpassword**

Press Enter key and all tables will be copied to the new created database.

## 5. Conclusion

The Configuration Manual is handy to configure and use the program to restore SQL backup data from corrupt/healthy files.
