v22.4

Kernel Migrator for SharePoint

# Introduction

Kernel Migrator for SharePoint is an effective migration tool which allows users to migrate SharePoint data to another SharePoint Server. It accesses sites, sub-sites, lists & libraries, and site collection from the source and places them neatly at the desired destination.

There is an inbuilt scheduler which lets the user schedule the migration at a fixed time and the migration will start automatically at the right time. It also migrates metadata along with the primary data.

Additionally, there are multiple migration available like Public Folder to SharePoint, SharePoint-to-SharePoint, Windows File System to SharePoint, OneDrive for Business, MS Teams, and Google Drive.

## Updates

- .....> Simplified login wizard to connect to multiple sites quickly
- .....> Better support for Google Drive personal account
- .....> New filters (chats, Channel posts & tabs, etc.) for MS Teams migration.
- .....> Enhanced speed for SharePoint List & Library migration.
- .....> Enhanced speed for Public Folder to SharePoint migration.
- .....> Enhanced speed for OneDrive and Google Drive migrations.

These new features improve the efficiency and accuracy of the SharePoint and all other supported migrations.
